

Retinal Exam

Front Range Eye Physicians is proud to offer our patients the best possible care. **Because of this we recommend the Optomap® Retinal Exam for all of our patients.** This non-invasive procedure allows your doctor to see a much broader and more detailed view of the retina than is possible with conventional methods. When reviewed, the scan becomes a permanent part of your medical file, enabling your doctor to make important decisions should potential vision-threatening conditions show themselves today or in the future. **Your doctors believe that the Optomap® Retinal Exam is an essential part of your comprehensive eye exam and they recommend it to all their patients once per year.**

As part of your evaluation, we may capture **Optomap®** images for review by your doctor during your examination today. **There is a \$39 fee for this procedure. In most (but not all) cases, the Optomap® alleviates the necessity for dilation.** Any questions you have about the **Optomap®** Retinal Exam can be directed to the staff or your doctor, when the images are reviewed with you during your examination.
